

GREETINGS!

from *STEM Middle @ Baldwin Road
Junior High*

We are so excited to share the unique learning experiences and educational opportunities we offer at STEM Middle @ Baldwin Road Junior High! Here at SMBR, we introduce students to educational pathways and career possibilities in the area of Health Science and Environmental STEM (E-STEM). We uniquely travel this path by exploring Health Sciences and E-STEM through a social justice lens that promotes the advancement of diversity and equity. Our building-wide *Signature Events*, Grade-Level Book Reads, Gifted & Accelerated Program, and unique STEM-based electives create an environment where students are able to explore the world around them and flourish as STEM Scholars! Below you will find several links containing important STEM Middle information.
